Subscription Rates

Annual Institutional Subscription Rate (1993) £1020.00 (US$1632.00)

Sterling prices are definitive. U.S. dollar prices are quoted for convenience only, and are subject to exchange rate fluctuation. Prices include postage and insurance and are subject to change without notice.

Subscription enquiries from customers in America should be sent to:
Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.,
and for the remainder of the world to:
Pergamon Press Ltd, Headington Hill Hall, Oxford OX3 0BW, U.K.

Second class postage paid at RAHWAY, NJ. Postmaster send address corrections to *Computational Mathematics and Mathematical Physics*, c/o Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.

Microform Subscriptions and Back Issues

Back issues of Pergamon journals, both in hard copy and on microform, are available direct from Pergamon Press offices.

VOLUME CONTENTS

VOL. 32, NO. 1 — 1992

T. Zhanlav and I. V. Puzynin	1	An evolutionary Newton procedure for solving non-linear equations
D. S. Dzhumabayev	10	Singular boundary-value problems and their approximation for non-linear ordinary differential equations
V. V. Kuznetsov	25	The parametrization of boundary conditions in shooting algorithms for the numerical solution of non-linear boundary-value problems
E. V. Zakharov, S. I. Safronov and R. P. Tarasov	34	Finite-order Abelian groups in the numerical analysis of linear boundary-value problems of potential theory
Yu. D. Pletner	51	Representation of the solutions of two-dimensional analogues of the Sobolev equation by generalized Taylor and Laurent series
S. P. Popov	61	On soliton perturbations excited by an oscillator in a boundary layer
A. I. Zuyev	70	Implicit method of solving the equations of radiative gas dynamics
V. I. Gryn and L. V. Nitishinskaya	81	Inverse three-dimensional problems of the simultaneous determination of the absorption coefficient and the source function for the transport equation
A. I. Khisamutdinov and S. O. Shishmareva	96	Non-simulation estimates in Monte-Carlo methods
V. N. Grebenev	103	The dynamic system that arises in the problem of the evaporation of a turbulent layer of a homogeneous fluid
G. K. Kamenev	114	A class of adaptive algorithms for approximating convex bodies by polyhedra
		Short Communications
Kh. D. Ikramov	128	Block symmetries in spectral problems for matrix bundles
A. Ya. Belyankov	132	Recalculation formulae for a partially resolving operator
G. A. Maksimova and A. A. Tret'yakov	137	Properties of regular mathematical programming problems
Ye. M. Kiseleva	142	Solution of the generalized Neyman–Pearson problem using the methods for the optimal partitioning of sets
S. A. Shishkin	148	Letter to the Editors

VOL. 32, NO. 2 — 1992

V. A. Zheludev	149	Periodic splines and the fast Fourier transform
B. V. Titkov	166	An algorithm for inverting discrete convolutions by sectioning
A. G. Perevozchikov	174	The convergence of Clarke's generalized gradient method in the minimization of Lipschitzian functions
V. A. Bushenkov and G. V. Smirnov	181	Regulation under conditions of uncertainty
V. V. Chumakov	191	Multistage decision-making problems with heterogeneous preferences under conditions of subjective uncertainty

V. V. BARANOV 205 Numerical methods of successive elimination and optimization in stochastic optimal control

N. YU. BAKAYEV 216 A multistep difference method for parabolic equations

K. G. ASLANIDI and V. P. MODENOV 229 A projection method of joining in the problem of the connection of waveguides

I. V. ANDRONOV 236 The application of point models of cracks in boundary-contact problems of acoustics

V. V. OSTAPENKO 245 The expansion of the difference solution on the front of a travelling shock wave

I. S. MEN'SHOV 257 Increasing the accuracy of the Godunov scheme for calculating stationary supersonic gas flows based on the solution of the generalized Riemann problem

Short Communications

A. S. BRATUS and A. D. MYSHKIS 264 The relation between the first and second natural frequencies of vibrations of a membrane

M. A. BRUTYAN and P. L. KRAPIVSKII 270 The exact solution of the Navier–Stokes equations for the evolution of the vortex structure in a generalized shear flow

O. V. TROSHKIN 273 A separated vortex in a flow of viscous liquid

S. A. VASIL'KOVSKII 275 The solution of stochastic standardization problems

VOL. 32, NO. 3 1992

L. V. MASLOVSKAYA 279 The conditions for the applicability of the generalized Cholesky algorithm

M. S. SAGITOV 287 A modification of Schur's method for solving a matrix algebraic Riccati equation

O. A. TARASOV and R. P. TARASOV 299 Numerical inversion of two-dimensional Laplace transforms in the algebra of triangular Toeplitz matrices over the ring of formal polynomials

R. A. BUN and YE. D. VASIL'YEV 317 A numerical method for solving differential equations with derivatives of any order

YU. G. BULYCHEV, I. V. BURLAI and S. A. POGONYSHEV 331 A numerical-analytic method of differentiating functions with a bounded spectrum based on Kotel'nikov's formula

L. N. SHABLITSKAYA and L. I. YAKUT 343 An algorithm for difference schemes which approximate the Cauchy problem for ordinary differential equations of any order

YU. A. KRIKSIN 353 Dynamic systems with an external action

P. N. VABISHCHEVICH 371 Numerical solution of a boundary-value problem for a parabolic equation with variable time direction

A. G. NIKITIN 379 Instability of contrasting spatial structures of the "burst" type in a reaction–diffusion system

A. YU. KARASEV 389 A model of correction in classification problems

Short Communications

A. R. POLUEKTOV 397 A method of choosing the regularization parameter for the numerical solution of ill-posed problems

GAO FEI and SHE SHUMAO 403 Eigenvalues of non-linear equations and the Feigenbaum formula

YU. A. DEM'YANOV 407 Asymptotic solution of a problem in the ignition of a hot fuel by a thermal flux of constant intensity

A. A. FROLOVA 413 The influence of the heat supply on the gas dynamic parameters of gas flow in a Laval nozzle

P. F. Zhuk 419 The asymptotic behaviour of the three-step method of steepest descent

S. A. Shishkin 421 Letter to the Editor

VOL. 32, NO. 4 1992

A. M. Fedotov 423 Minimax regularization for operator equations with random errors in the data

V. N. Nefedov 433 Some problems of solving Lipschitzian global optimization problems using the branch and bound method

Guo Ben-Yu (Kuo Pen-Yu) 447 Generalized stability of discretization and its applications to numerical solutions of non-linear partial differential equations

A. A. Zlotnik 459 Properties of a projective-grid method with a quasidecoupled operator for second-order hyperbolic equations

G. I. Shishkin 467 A difference approximation of a singularly perturbed boundary-value problem for quasilinear elliptic equations degenerating into first-order equations

A. A. Abramov and V. I. Ul'yanova 481 A method for solving biharmonic-type equations with a singularly occurring small parameter

V. A. Voronina 489 A stochastic method of solving an initial boundary-value problem for the Boltzmann equation

G. V. Alekseyev and Ye. G. Komarov 499 The non-self-conjugate singular spectral problem for a Helmholtz operator with discontinuous coefficients

N. M. Vyval'tsev 509 A method of calculating the flow around and aerodynamic design of the profiles of turbomachinery blade grids

N. O. Dzhgamadze and A. V. Popov 521 The convergence of a difference scheme for the two-dimensional equations of gas dynamics

M. Ya. Ivanov and V. G. Krupa 531 Calculation of the spatial interaction of a shock wave with a boundary layer on a cylinder

O. V. Sen'ko 543 Estimate of the a posteriori probabilities of objects belonging to classes in the case of a voting procedure

Short Communications

V. I. Kabanovich and A. M. Kurbatov 553 Calculation of a lattice function

A. M. Bagirov 561 A method of approximating a subdifferential

A. M. Denisov 567 The uniqueness of the solution of the problem of determining non-linear kinetic coefficients

V. N. Koterov and A. G. Krasnovskii 573 A spectral-difference method for calculating acoustic disturbances initiated by a local heat source in a moving medium

VOL. 32, NO. 5 1992

S. I. Solov'yev 579 The error of the Bubnov–Galerkin method with perturbations for symmetric spectral problems with a non-linearly occurring parameter

M. V. Fedoryuk 595 Estimates of spheroidal functions

B. B. Pokhodzei 611 Simulation of finite discrete distributions: a tabular approach

G. I. Shishkin 621 A difference scheme for a singularly perturbed parabolic equation degenerating on the boundary

A. N. Muchinskii and V. A. Tsurko 637 The boundary conditions for locally one-dimensional schemes for multi-dimensional parabolic equations

Yu. D. Pletner 645 The construction of the solutions of some partial differential equations

V. I. Gryn 659 Inverse problems of the theory of stationary radiation transfer in two-dimensional plane geometry

A. B. Samokhin 673 Diffraction of electromagnetic waves by a locally non-homogeneous body and singular integral equations

A. F. Matveyev and N. M. Molyakov 687 The numerical solution of the integral equations in the aerodynamics of permeable surfaces

Short Communications

B. M. Shumilov 701 Smooth interpolation of surfaces by second-degree parametric splines on an irregular triangular grid

A. A. Strotsev and V. V. Khutortsev 707 A modified invariant embedding method and its application to solving linear two-point boundary-value problems

V. A. Korobitsyn 711 Fully conservative axisymmetric difference schemes in orthogonal curvilinear coordinate systems

---

VOL. 32, NO. 6 1992

Kh. D. Ikramov 719 Concommutativity classes generated by matrices with multiple conspectrum

T. Zhanlav and I. V. Puzynin 729 The convergence of iterations based on a continuous analogue of Newton's method

S. M. Dzholdybayeva and G. K. Kamenev 739 Numerical analysis of the efficiency of an algorithm approximating convex bodies by polyhedra

L. F. Yukhno 747 A numerical method for solving multidimensional hyperbolic systems

Raim. Yu. Chegis 757 Investigation of difference schemes for a class of models of excitability

Yu. D. Pletner 769 The properties of the solutions of some partial differential equations

A. Yu. Shcheglov 781 A method for the approximate solution of an inverse problem for the heat-conduction equation

V. V. Gudkov 793 The existence and uniqueness of the solution of the boundary-value problem for the one-dimensional drift-diffusion model of a semiconductor device

A. I. Grigor'ev and A. E. Lazaryants 803 A method of solving the Navier–Stokes equations in curvilinear systems of coordinates

A. V. Shcheprov 811 Calculation of a flow of viscous fluid on adaptive grids

V. M. Borisov and A. A. Ivankov 823 Calculation of radiant-energy transfer in hypersonic flow round blunt bodies using the P_1- and P_2-approximations of the method of spherical harmonics

V. V. Kalashnikov and S. D. Kostornoi 837 A numerical method for solving the problem of ideal fluid flow around arbitrarily positioned bodies

Short Communications

G. G. Rasputin 845 Orthogonal polynomials and some cubature formulae for an integral with radially symmetric weight

A. A. Krapivina 849 A method of solving real linear homogeneous second-order differential equations in an infinite interval

A. N. Golub 857 A method of averaging the equations of radiation kinetics and transport to solve one-dimensional problems of non-equilibrium radiative gas-dynamics

VOL. 32, NO. 7 1992

V. G. Antonik and V. A. Srochko 859 The solution of optimal control problems using linearization methods

V. I. Norkin 873 Piyavskii's method for solving the general global optimization problem

A. B. Vasil'yeva and M. A. Petrova 887 Contrast structures in equations of elliptic type

V. G. Prikazchikov 897 The leading term of the error expansion for eigenvalues of a discrete analogue of a fourth-order elliptic operator

V. S. Sakovich 907 Generating computational grids using implicit functions

S. V. Tsvetkov 917 The finite element method for solving a class of three-dimensional external problems of electrodynamics

I. A. Chegis 929 The solution of the problem of the distribution of eddy currents

O. E. Grigor and M. B. Tverskoi 941 An investigation of capillary–gravitational waves of finite amplitude on the surface of a floating liquid

I. A. Vasin 955 On some inverse problems of the dynamics of a viscous incompressible fluid in the case of integral overdetermination

G. Z. Tsertsvadze 965 The convergence of a completely conservative difference scheme for gas-dynamic equations in Euler variables

P. M. Vyval'tsev and M. Ya. Ivanov 977 A rapid method for calculating spatial transonic potential flows in the blade rings of turbomachines

O. V. German, Ye. I. Germanovich and V. G. Naidenko 995 Boolean optimization algorithm for (0,1)-matrices

Short Communications

Kh. D. Ikramov 1007 Some comments on the generalized Cholesky algorithm

M. S. Sagitov 1013 A finite splitting algorithm for a complex J-symmetric pencil

E. M. Dmitriyev and N. A. Tikhonov 1017 The existence and uniqueness of the solution of a problem of the dynamics of many-component ion exchange

M. P. Levin and L. V. Sidorov 1023 A method of calculating supersonic three-dimensional flows in pyramidal nozzles

V. F. Snigirev 1027 The construction of degenerate splines for solving function interpolation problems and the geometric modelling of lines

Ye. P. Akkuratov 1029 A method for the accurate solution of a boundary-value problem for Laplace's equation

F. F. Nevzorov 1033 A conformal-integral method for solving the direct problem of the aerodynamics of grids of turbomachine profiles

VOL. 32, NO. 8 1992

Kh. D. Ikramov 1037 Algebraic properties of classes of concommuting and H-selfadjoint matrices

A. M. Levin 1049 An upper bound for the regularization parameter in incompatible operator equations

S. L. Blyumin and A. K. Pogodayev 1059 Blockwise recursive-iterative procedures for the least-squares solution of non-linear problems

B. M. Shumilov 1065 Spline approximation schemes that are exact for polynomials

O. Obradovic, M. M. Potapov and A. V. Razgulin 1075 A regularized gradient-projection method in a parabolic optimal control problem

O. L. Chernykh 1085 Constructing the convex hull of a point set as a system of linear inequalities

I. L. Averbakh 1097 Group-theoretic decomposition methods in integer linear programming

U. G. Abdullayev 1109 Unbounded solutions of the non-linear equation of heat conduction with a sink

A. G. Belyayev, A. G. Mikheyev and A. S. Shamayev 1121 Diffraction of a plane wave by a rapidly oscillating surface

N. D. Turetayev 1135 Investigation of finite difference schemes for the Korteweg–de Vries equation

V. G. Priimak 1151 A family of pseudospectral algorithms for integrating the Navier–Stokes equations in a cylindrical system of coordinates

Short Communications

A. F. Izmailov 1167 Necessary higher-order conditions in extremum problems

R. Gabasov, F. M. Kirillova and Ye. A. Kostina 1171 Global maximization of special classes of convex functions on a convex polyhedral set

I. S. Litvinchev 1179 Iterative aggregation and decomposition in block-separable extremum problems

A. G. Kolpakov 1183 The solution of the convex combination problem

I. P. Ryazantseva 1189 Tikhonov's method in non-linear monotone problems

I. V. Savenkov 1191 Resonance amplification of two-dimensional perturbations in a semi-infinite channel

VOL. 32, NO. 9 1992

L. A. Knizhnerman 1199 Error bounds in Arnoldi's method: the case of a normal matrix

I. Ya. Tsurkis 1213 The solution of an irregular system of linear algebraic equations

E. R. Shifman 1231 Approximate solution of a system of three-point vector equations with constant coefficients

I. L. Osipov 1239 Reconstruction of a surface that has a continuous curvature and is defined on a flat point manifold

A. I. Tkachenko 1251 Successive evaluation of the coordinates of the solution of the least-squares problem

D. M. Vavriv and V. B. Ryabov 1259 Running Lyapunov exponents and the conditions for the occurrence of chaos

P. D. Shirkov 1271 L-Stability for diagonally-implicit Runge–Kutta schemes and Rosenbrock's method

O. A. Dremov, A. V. Koldoba and Yu. A. Poveshchenko 1281 Investigation of support operator method difference schemes

O. A. Nekhamkina and M. Kh. Strelets 1295 Numerical modelling of detonation waves using an efficient TVD-scheme

R. R. Gadyl'shin 1311 A Helmholtz resonator with a small aperture

M. I. Letavin 1323 A singularly perturbed problem of the heating of a metal

Short Communications

A. A. Kobozeva and L. V. Maslovskaya 1339 A generalized Cholesky algorithm for plate and shell theory problems

A. V. Zhukov 1347 A method for approximating functions

A. B. Bakushinskii 1353 The problem of the convergence of the iteratively regularized Gauss–Newton method

L. V. KALACHEV and I. A. OBUKHOV 1361 The asymptotic form of the solution of Poisson's equation in a model of a three-dimensional semiconductor structure

R. P. TARASOV 1367 Harmonic analysis on finite groups and methods for the numerical solution of boundary equations in boundary-value problems with non-Abelian symmetry group

M. N. KOTOV and O. V. SMERTIN 1371 Universal representations of Green's waveguide functions and their derivatives

VOL. 32, NO. 10 1992

R. P. TARASOV 1373 The computation of functions in the algebra of formal polynomials and multidimensional digital signal processing algorithms

D. O. FILIMONENKOV 1391 Error estimates for certain piecewise-polynomial approximations in a plane

V. V. KLEIZA and I. V. KLEIZA 1399 The properties and evaluation of an integral with power singularities

A. F. IZMAILOV 1413 Degenerate extremum problems with inequality-type constraints

A. B. VASIL'YEVA 1423 Contrast structures with two step-like transition layers and their stability

YU. A. YEROMIN and A. G. SVESHNIKOV 1433 Problems of recognition and synthesis in diffraction theory

V. I. GRYN' 1445 Variational problems of radiation-transfer theory and the method of spherical functions

A. G. KUZ'MIN 1461 The stability of transonic decelerating flow in a channel

A. V. VOYTISHEK and S. M. PRIGARIN 1471 The functional convergence of the limits and models in the Monte Carlo method

Short Communications

V. V. MOKEYEV 1481 The problem of finding the eigenvalues and eigenvectors of large matrix systems

V. I. KABANOVICH and A. M. KURBATOV 1487 The evaluation of one family of triple integrals

S. D. ALGAZIN 1491 Discretization of the Laplace operator and the fast solution of Poisson's equation in a torus

V. G. GRIGOROVICH and V. V. KRAVTSOV 1497 The radiation of acoustic waves from a surface through a non-uniform layer

V. G. PRIKAZCHIKOV 1501 The principal term in the expansion of the error of the eigenvalues of the discrete analogue of an elliptic operator

V. B. KARAMYSHEV 1507 An approach to the construction of marching algorithms for stationary problems of gas dynamics

VOL. 32, NO. 11 1992

I. A. BLATOV and A. A. TERTERYAN 1509 Estimates of the elements of inverse matrices and pivotal condensation methods of incomplete block factorization

A. A. KOBOZEVA and A. P. FILIPPOVICH 1523 Frontal and profile methods of solving systems of linear algebraic equations in mixed finite element methods

M. G. BER and V. N. MALOZYOMOV 1533 The best formulae for the approximate computation of discrete Fourier transforms

A. B. KURZHANSKII and I. F. SIVERGINA 1545 The guaranteed-estimates method and regularization problems for evolutionary systems

T. Jankowski 1559 The stability of one-step methods for non-linear multipoint boundary-value problems

Yu. M. Layevskii 1569 A domain partitioning algorithm without subdomain overlap for solving parabolic equations

V. Sh. Odishariya 1581 The existence of a solution and a proof of the Bubnov–Galerkin method for the one-dimensional Reissner system

M. I. Kalinichenko 1593 Difference schemes for a problem of laser thermochemistry in gases

A. V. Shipilin and V. N. Shlyonskii 1605 An iterative method for the numerical solution of the semiconductor plasma equations

W. Weinelt, A. L. Goncharov, I. V. Fryazinov and K.-H. Hartwig 1617 Numerical methods of solving the problem of the injection of plastic into thin moulds under pressure

A. M. Bishayev and V. A. Rykov 1629 Variational principles for the linear Boltzmann equation

Kh. B. Allakhverdiyev, Yu. D. Pletner and A. G. Sveshnikov 1641 The oscillations of a vertical column of stratified liquid with a free surface

Short Communications

V. I. Gryn 1649 Two-step iterational regularization methods

M. B. Tverskoi 1655 The flow of a stratified liquid around point obstacles

N. A. Nurlybayev 1661 The method of discrete velocities for solving the Boltzmann equation

P. Ye. Filimonov 1667 An ordering in R^n of a set of permutations

A. B. Pevnyi 1671 Computation of Jacobi elliptic functions using a Gauss transformation

VOL. 32, NO. 12 1992

S. B. Stoyanova 1675 Cubature formulae of the fifteenth degree of accuracy for a hypersphere

N. M. Popov 1685 Estimating the information complexity of global optimization and the global solution of equations

S. I. Dudov 1701 Necessary and sufficient conditions for the maximin of a function of the difference of arguments

Yu. D. Pletner 1715 Fundamental solutions of Sobolev-type operators and some initial boundary-value problems

S. Sh. Bimuratov and S. I. Kabanikhin 1729 The solution of one-dimensional inverse problems of electrodynamics by the Newton–Kantorovich method

V. N. Grebenov 1745 Diffusion of a turbulent spot in a problem with singularly perturbed initial turbulence energy

K. V. Brushlinskii, V. S. Ryaben'kii and N. B. Tuzova 1757 The transfer of boundary conditions across a vacuum in axisymmetric problems

N. I. Pisaruk 1769 The boundaries of submodular functions

O. I. Beryozkin, A. V. Serolapkin and N. L. Chenskikh 1785 The application of recognition methods in problems of medical diagnostics

A. N. Teterin 1797 A geometric approach to classification—a new model of the operation of a neuron

V. A. Daugavet and T. M. Salikh 1807 The complementary basis method for problems of convex quadratic programming

Short Communications

M. V. Noskov 1819 Cubature weight formulae of highest algebraic accuracy

S. V. KUROCHKIN 1821 The discrete character of the spectrum of a linear two-point boundary-value problem with constraints at singular points

V. G. ANISIMOV and YE. G. ANISIMOV 1827 A branch-and-bound algorithm for one class of scheduling problem
